

AcoustiCube 10 and 12

The Acousticube is a 9" cube designed to typify sound from pipes.—360 degree dispersion. Unlike typical speakers, sound emanates from the Acousticube from all sides. Organ sound reflects off rear and side surfaces, providing increased dimension to the sound. They are meant to be suspended from beams or ceiling.

Acousticubes are used with a woofer cabinet for each channel. Depending on the application, the accompanying woofer can be a 10" (Acousticube 10) or a 12" (Acousticube 12). This configuration is ideal for situations where there are no pipe or speaker chambers and speakers have to be exposed.

Acousticube 10

Consisting of:

Woofer Cabinet — one 10" driver.

Acousticube — two 6" mid-range, and two titanium dome tweeters

Frequency Response: 30Hz to 18Khz

Power Handling: 200 Watts

Cabinet Weight: 40Lbs

Dimensions: Acousticube — 9" cubed
Woofer Cabinet — built to fit appl.

Acousticube 12

Consisting of:

Woofer Cabinet — one 12" driver.

Acousticube — two 6" mid-range, and two titanium dome tweeters

Frequency Response: 30Hz to 18Khz

Power Handling: 250 Watts

Cabinet Weight: 45Lbs

Dimensions: Acousticube — 9" cubed
Woofer Cabinet — built to fit appl.
